- Multi-purpose professional kit suitable for all spray guns
- Comprehensive range of brushes and tools
- Can be easily hung in the gun cleaning area
- Includes cleaning instructions and spray gun oil

DEVILBISS

The Right Way To Finish™

The Professional Spray Gun Cleaning Kit from DeVilbiss is the convenient, practical and inexpensive system for cleaning DeVilbiss, Binks, FinishLine and all other major brands of spray equipment.

The kit contains:

1/2" Brush

Use to clean the gun fluid inlet, gun air inlet, gun body (air and fluid passages), gravity cup outlet and suction cup tube.

Cleaning Needles & Handle

A range of fine needles with useful handle for easy cleaning of air cap holes. Care must be taken when using this tool so that holes are not damaged. If damage occurs the spray pattern and gun performance could be affected.

Pick

Useful additional tool for removing needle packing, air cap retaining ring clip, internal gun seals and cup gasket.

Spray Gun Oil

After cleaning a spray gun the vital pivoting or friction points should be lubricated. For your convenience a sachet of DeVilbiss spray gun oil is included in the kit.

3/16" End Brush

Use to clean the inside fluid tip, inside air cap and any area that requires a smaller, stiffer brush.

3 Piece Mini-Brush Set

Use for cleaning the centre hole of the air cap, horn holes of the air cap, fluid tip, baffle and any small spray gun passage.

Black Handled Brush

General purpose tool for cleaning gun body, cup, air cap and ring, trigger and gun controls.

The kit is available now from your local authorised DeVilbiss distributor, Part Number. KK-4584
